INTERPRETING THE SCORES
28-33 - Healthy. You might want to look at your lower scores and improve these areas for greater strength.
23-27 - Transitional: You've got some areas that probably need attention. Read the material below describing each of the key points and see if that suggests action.
19 or less - Young/Weak. Either you're network/partnership is early in it's development or it is weak and probably isn't meeting your expectations.
